

# **WRITINGS FOR SMR, ASIR, EVA & IEA**

A dark blue diagonal graphic element that starts from the bottom left corner and extends towards the top right, creating a triangular shape in the lower half of the slide.

# LIFE WITHOUT TECHNOLOGY. COULD I SURVIVE?

## Guideline

### 1. Introduction (20–30 words)

- Introduce the idea of living without technology.
- Example: *Technology is part of our daily lives, but have you ever imagined living without it? I'm not sure I could!*

### 2. Body (70–90 words)

- Explain which technologies you use most (phone, internet, computer, etc.).
- Describe how your life would change without them and what problems you would face.
- Use connectors: *first, then, also, however, on the other hand, although, without it...*

### 3. Conclusion (10–30 words)

- Express your opinion or reflection.
- Example: *I think I couldn't survive without technology because it connects me with the world.*

# EXAMPLE

## Example (139 words)

I can't imagine living without technology because it's part of everything I do. I use my phone to communicate, my computer to study, and the internet to find information. Without these things, my life would be completely different.

I think I would feel bored and disconnected from my friends. Of course, there would be some positive sides — maybe I would spend more time outdoors or reading — but it would still be very hard.

Technology saves time, helps me learn faster, and keeps me entertained. It's true that sometimes we depend on it too much, but for me, it's essential. Life without technology would be possible, but definitely uncomfortable. I don't think I could survive for long!

# HOW I USE TECHNOLOGY EVERYDAY?

## Guideline

### 1. Introduction (20–30 words)

- Introduce how technology is part of your daily life.
- Example: *Technology plays an important role in my day. I use it from the moment I wake up until I go to sleep.*

### 2. Body (70–90 words)

- Describe specific ways you use technology: studying, communicating, entertainment, etc.
- Include examples and reasons why it's useful.
- Use connectors: *first, after that, then, also, because, for example, finally...*

### 3. Conclusion (10–30 words)

- Reflect on how technology makes your life easier or more interesting.
- Example: *Technology helps me stay connected, learn new things, and enjoy my free time.*

# EXAMPLE

## Example (126 words)

Technology is part of my daily routine. Every morning, I use my phone as an alarm clock and to check messages from my friends.

At school, I often use a tablet or a computer to take notes and do online exercises. After classes, I watch videos or listen to music on YouTube to relax. I also use technology to communicate with my family who live in another city.

It helps me stay connected and share special moments with them. In the evening, I sometimes play video games or watch a series before going to bed. I think technology makes life easier, faster, and more fun — but it's also important to know when to disconnect.

# MY ECO-FRIENDLY ROUTINE

## STRUCTURE:

### 1. Introduction (20–30 words):

- Introduce the topic: why saving energy or being eco-friendly is important.

### 2. Body (60–80 words):

- Describe your daily or weekly actions to save energy.
- Use **linkers** like *first, then, also, because, for example, finally*.
- Include **present simple** and **frequency adverbs** (*always, usually, sometimes*).

### 3. Conclusion (20–30 words):

- Explain how these actions make a difference or how you feel about helping the planet.

# EXAMPLE

## **Example (130 words): My Eco-Friendly Routine**

Every day I try to protect the environment by saving energy and reducing waste. In the morning, I open the windows and use natural light instead of turning on the lamp.

I always unplug my phone charger when I'm not using it because it still uses electricity. When I leave a room, I switch off the lights and the computer. I also take short showers to save water and I recycle plastic, paper, and glass at home.

At school, I bring my own bottle and lunch box instead of using disposable ones. These simple actions are not difficult, but they really help our planet. I feel proud because I know that small changes in my routine can make a big difference for the future.

# MY DAILY ROUTINE AT THE WORKSHOP

## Structure:

1. **Introduction:** Explain where you work or study and what kind of workshop it is.
2. **Body:** Describe your daily tasks, tools you use, and how your day is organized (use *present simple* and *time expressions: in the morning, after lunch, at the end of the day*).
3. **Conclusion:** Mention what you like most about your routine or what you've learned.

# EXAMPLE

## **Example (130 words): My Daily Routine at the Workshop**

Every morning I start my day at the workshop at 8:30.

First, I put on my uniform and safety gloves. Then I check the tools and prepare the materials I need for the day. I usually work with my classmates to repair or build small metal pieces. Sometimes we use machines, so we must be careful and follow all safety rules.

After lunch, I clean my work area and organize the tools. I also write notes about what I have done or learned. At the end of the day, we talk about the next project. I enjoy working with my hands and learning how to use new equipment.

My routine helps me become more responsible and independent every day.

# THE PERFECT WORKER: HABITS AND RESPONSIBILITIES

**Introduction:** Define what makes a good or “perfect” worker.

**Body:** Describe good habits (punctuality, teamwork, safety, organization) and responsibilities. Use *modal verbs* like *must, should, have to*.

**Conclusion:** Explain why these qualities are important in a workshop or job.

# EXAMPLE

## **Example (140 words): The Perfect Worker: Habits and Responsibilities**

A perfect worker is not only skilled but also responsible and respectful. In a workshop, workers must arrive on time and wear the correct safety equipment. They should follow instructions carefully and never ignore safety rules.

A good worker keeps the tools clean and organized, and always helps their teammates when needed. It's important to communicate clearly and listen to others' ideas. Workers also have to focus on their tasks and avoid distractions. When a problem appears, they try to find a solution instead of complaining.

Being polite, patient, and positive helps create a good atmosphere in the workplace. In my opinion, the perfect worker is someone who works hard, learns every day, and takes pride in doing their job well.
